product

Rose Gold Water <Badacsonyi Aranyvíz> bottles the genuine spring water of Kisfaludy spring with gravity pressure (5 bars) resulting from the natural difference in level (between the spring and the plant). This water is the vehicle of the rose petal distillate, which is an essence worth of gold perfection. The field of force of its waters means the magical heritage of Badacsony. Rose Gold Water draws from this tradition so that you can pour the *water of life*, the *source of youth* and the *drink of eternity* in your glass with a drop of the noble hydration. The *body* of the recipe is spring water filtered at full moon; its *soul* is the rose petal distillate; its *spirit* is pure 24K gold. It is an artisan water speciality, functional food product that might: promote general feeling of well being; enhance the body's natural defenses; stimulate the body's restoration and rejuvenation functions; increase conductivity between nerve endings; improve SQ and reduce dependency on obsession (alcohol, caffeine, nicotine, carbohydrates).
